## 1. Functions

### ***DrvBOD\_SelectBODVolt***

#### **Prototype**

```
void DrvBOD_SelectBODVolt(uint8_t u8Volt);
```

#### **Description**

Select BOD voltage Level

#### **Parameter**

u8Volt: 7=4.5V, 6=3.V, 5=2.8V, 4=2.7V  
3=2.5V, 2=2.4V 1=2.2V, 0=2.1V

#### **Include**

Driver/ DrvBODTALARM.h

#### **Return Value**

None

### ***DrvBOD\_SelectBODHyst***

#### **Prototype**

```
void DrvBOD_SelectBODHyst(uint8_t u8Hysteresis);
```

#### **Description**

Select BOD Hysteresis

#### **Parameter**

u8Hysteresis: 1= Enable Hysteresis of BOD detection  
0= Hysteresis Disabled

#### **Include**

Driver/ DrvBODTALARM.h

#### **Return Value**

None

### ***DrvBOD\_EnableBOD***

#### **Prototype**

```
void DrvBOD_EnableBOD(uint32_t u32Enable);
```

#### **Description**

Enable BOD function

#### **Parameter**

u32Enable: 1x = Enable continuous BOD detection

01 = Enable time multiplexed BOD detection

00 = Disable BOD detection

#### **Include**

Driver/ DrvBODTALARM.h

#### **Return Value**

None

### ***DrvBOD\_ SetBODIE***

#### **Prototype**

```
void DrvBOD_SetBODIE(uint32_t u32BODIE);
```

#### **Description**

Enable BOD Interrupt

#### **Parameter**

u32BODIE: 1 = Enable BOD interrupt

0 = Disable BOD interrupt

#### **Include**

Driver/ DrvBODTALARM.h

#### **Return Value**

None

### ***DrvBOD\_ GetBODout***

#### **Prototype**

```
uint32_t DrvBOD_GetBODout(void);
```

#### **Description**

Get BOD output block

#### **Parameter**

None

#### **Include**

Driver/ DrvBODTALARM.h

#### **Return Value**

Output of BOD detection block

### ***DrvBOD\_ SetTALARMselect***

#### **Prototype**

```
void DrvBOD_SetTALARMselect(uint32_t u32LVL);
```

### Description

Set Tempature Alarm Sensor Level

### Parameter

u32LVL: 1000b=145°C      0100b=135°C      0010b=125°C  
                                  0001b=115°C      0000b=105°C

### Include

Driver/ DrvBODTALARM.h

### Return Value

None

## ***DrvBOD\_ EnableTALARM***

### Prototype

```
void DrvBOD_EnableTALARM(uint32_t u32Enable);
```

### Description

Enable TALARM function

### Parameter

u32Enable: 1 = Enable TALARM detection  
                                  0 = Disable TALARM detection

### Include

Driver/ DrvBODTALARM.h

### Return Value

None

## ***DrvBOD\_ GetTALARMstatus***

### Prototype

```
uint32_t DrvBOD_GetTALARMstatus(void);
```

### Description

Get status of TALARM

### Parameter

None

### Include

Driver/ DrvBODTALARM.h

### Return Value

Status of TALARM block

## ***DrvBOD\_SetTALARMIE***

### **Prototype**

```
void DrvBOD_SetTALARMIE(uint32_t u32TALARMIE);
```

### **Description**

Enable BOD Interrupt

### **Parameter**

u32TALARMIE: 1 = Enable TALARM interrupt  
0 = Disable TALARM interrupt

### **Include**

Driver/ DrvBODTALARM.h

### **Return Value**

None

## ***DrvBOD\_SetDetectionTime***

### **Prototype**

```
void DrvBOD_SetDetectionTime(uint32_t u32OnDUR, uint32_t u32OffDUR);
```

### **Description**

Set up BOD detector to take periodic samples of the supply voltage to minimize power consumption

### **Parameter**

u32OnDUR: Time BOD detector is active (ms)  
u32OffDUR: Time BOD detector if off (ms)

### **Include**

Driver/ DrvBODTALARM.h

### **Return Value**

None

## ***DrvBOD\_InstallISR***

### **Prototype**

```
void DrvBOD_InstallISR(PFN_DRV_BODTALARM_CALLBACK callback, int32_t i32para);
```

### **Description**

This function is used to install BOD & TALARM callback function

### **Parameter**

callback: call back function

i32para: 0=Setting BOD call back function;  
1=Setting TALARM call back function

### Include

Driver/ DrvBODTALARM.h

### Return Value

None

## ***DrvBODTALARM\_GetVersion***

### Prototype

```
int32_t DrvBOD_GetVersion(void);
```

### Description

Get the version number of BOD driver.

### Include

Driver/ DrvBODTALARM.h

### Return Value

Version number :

31:24	23:16	15:8	7:0
00000000	MAJOR_NUM	MINOR_NUM	BUILD_NUM

## 2. Revision History

Version	Date	Description
1.00.01	Mar. 2011	Preliminary BOD and TALARM Driver User Guide of ISD9160
